

## COVID-19 (novel coronavirus) Response

### **National Update – Tuesday, March 17 6:45 PM EST**

Sunrise continues to take the COVID-19 pandemic seriously, and the health and well-being of our residents and team members remain our absolute top priority. Sunrise leaders are closely monitoring the constant flow of updates from government and health authorities to continue supporting our communities.

Today's update is on **dining changes**. All residents who do not require assistance with dining will now have meals delivered to their suites to minimize their contact with others. For residents who may need support while dining, we have established protocols that align with our infection control plan for meals to occur in the dining room, with one resident per table, handwashing before and after dining, discontinuing the use of table linens, and ensuring proper sanitation of all dining room surfaces. We recognize this change may be disruptive, specifically for those with cognitive and memory challenges, and we are taking measures to help ensure a smooth transition for all residents during this time.
